## **DETAILED ACTION**

## Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-2, drawn to deposit sensing apparatus, classified in class 374, subclass 7.
- II. Claims 3-34, drawn to method for the measurement of differential heat flux, classified in class 374, subclass 29.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, Invention I does not require cooling fluid, microprocessor, reference surface, sonic waves, etc. required by Invention II. Invention I does not require method of Invention II and can be used with another method which does not require cooling fluid, microprocessor, reference surface, sonic waves, etc. required by Invention II.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/717,154

Art Unit: 2859

A telephone call was made to Mr. Peacock on August 31, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Page 3

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.

Any inquiry concerning this communication should be directed to the Examiner Verbitsky who can be reached at (571) 272-2253 Monday through Friday 8:00 to 4:00 ET.
